Software Engineer

I am a skilled software engineer with a strong proficiency in web development technologies. I am committed to staying up-to-date with the latest industry trends and technologies to drive innovation and efficiency.

PROJECTS

FOOD BANK

Created Food Bank website with database connection where users can donate food with the help of NGOs to the needy ones.

IoT Based Food spoilage Detector

Created a physical device using Arduino kit and sensors which will detect the food quality by the NGOs and later will be feeded to those who are in need.
